

## How to make a Door Hanger

Before you print your door hanger, make sure you have some strong paper/card so that it is sturdy.

Print the page with the door hanger using a colour printer. Make sure the front and back are on the same page.

Fold the page along the line in the middle. Make sure that the front and back fit exactly against each other.

Glue both pieces together so that they cannot open.

Then you can cut out the door hanger along the dotted line.

Your door hanger is now ready and you can hang it on the door of your room.

Have fun!
